# Unipro UniStop

## The Simple Stop Watch
Unipro UniStop - an effective timing tool, right at your fingertips.

## The basic functions are easy to use
In the development of Unipro UniStop, it has been an important issue, that the basic stop watch functions should be very easy to use.

With Unipro UniStop you have direct access to four lap buttons and four split buttons.

With the large graphic display you can read all information in plain text in your own language. Operated from simple menus without getting a headache.

If you wish more advanced features, check out Unipro UniWatch with built-in infrared temperature sensor and a lot more.

## Features

| | |
|---|---|
| **Easy to operate** | The basic functions are very easy to use with direct access to laps and splits for all four drivers. |
| **Up to 4 drivers and 9 splits** | You can measure lap times for up to 4 drivers with up to 9 splits on each driver. |
| **Large high resolution display** | The large high resolution display will give you a very quick overview. |
| **Huge memory** | The big dynamic memory allows up to 1.950 laps or splits. That equals to 48 laps for four drivers with 9 splits each. |
| **Visual feedback** | The three powerful LEDs will give visual indication of faster/slower laps and splits. |
| **Real-time clock** | The built-in real-time clock shows time and date in both 12 and 24 hour mode. |
| **Multi-language interface** | You can choose your own language for the stop watch user interface. You can always check uniprolaptimer.com for current languages supported. |
| **Transfer data to a PC** | With an optional USB cable you can transfer all data from the stop watch to a PC. |
| **KeyStrap included** | From the hole at the bottom, you can hang UniStop around you neck with the included unique Unipro KeyStrap. |
