UniGo 5005

UniGo 5005 with a new graphical display

The UniGo 5005 has a display with large graphical characters and a new and very intuitive layout.

Laptimer and Data Logger in one

Driver and mechanics can analyse results directly on the Laptimer. The UniGo 5005 records data up to 60 times per second allowing for in-depth analysis on a computer with the included software.

Export data to the new Unipro USB key

If you buy the new Unipro USB key you don't need to bring your computer to the go-kart.

The included analysis software provides a complete overview which enables you to compare results between drivers, training sessions, and heats.

Available for both Windows and Mac OS based computers.

Features

| | |
|-----------------------------------|--|
| All-In-One System | A powerful 32-bit processor controls the user interface, logging and communication to other boxes. Connects directly to sensors from the box. |
| Lightweight Plastic Casing | The elegant display casing is just 18 millimetres thick and made of lightweight plastic. Available in several colours. |
| Advanced Analysis Software | Analyse and compare results from different laps and drivers with the Analysis Software. This allows you to determine the best set-up for both kart and engine. |
| Easy to Operate | Menu based user interface with explaining help text. Select between different languages. Setup can be moved from one UniGo to another. |
| Advanced Graphic Display | High resolution display with 16 gray tones ensures easy-to-read text and icons. |
| Fast Uploading of Data | Equipped with a USB high-speed interface enables transfer of data to either a computer or to the optional Unipro USB flash key. |
| Advanced Data Logging | Selectable channels and logging frequencies from 1 Hz to 60 Hz. |
| Additional Features | 2 temperature inputs*, IR or magnet trigger input, speed sensor input*, ambient temp, real-time clock, and almost unlimited laps and logging capability. |
| Future Expandability | Expand the UniGo with additional channels with an optional Front and Rear box. Ready to connect to future sensors with a local network. |

* Cable splitter needed
